Stanford

Earth Hasassri, MD

Adjunct Clinical Assistant Professor, Psychiatry and Behavioral Sciences - Child & Adolescent Psychiatry and Child Development

Bio

BIO

Dr. Earth Hasassri is an Adjunct Clinical Assistant Professor in the Department of Psychiatry and Behavioral Sciences, Division of Child and Adolescent Psychiatry and Child Development, at Stanford University School of Medicine. He is dual board-certified in General Psychiatry and Child and Adolescent Psychiatry and maintains a private practice in Menlo Park, California. He is actively involved in teaching and mentoring medical students, residents, and fellows at Stanford.

Dr. Hasassri specializes in the evaluation and treatment of children, adolescents, and adults with complex psychiatric and neuropsychiatric conditions, including attention-deficit/hyperactivity disorder (ADHD), autism spectrum disorder, mood and anxiety disorders, obsessive-compulsive disorder (OCD), functional neurological disorders, and psychiatric conditions associated with neurological and other medical illnesses. His clinical approach integrates psychopharmacology, psychotherapy, and an understanding of the neurobiological underpinnings of psychiatric illness.

His clinical and academic interests include interventional psychiatry, neuromodulation, and the application of neuroscience to personalized psychiatric treatment. He has a particular interest in transcranial magnetic stimulation (TMS), including accelerated treatment protocols and emerging approaches to individualized, circuit-based brain stimulation. He is especially interested in expanding the role of neuromodulation in treating complex and treatment-resistant psychiatric conditions and exploring its potential applications in child and adolescent psychiatry.

Prior to medical school, Dr. Hasassri earned dual bachelor's degrees in Physiology and Neuroscience and Psychology from the University of California, San Diego, where he conducted research in sleep medicine. He received his medical degree from Mayo Clinic Alix School of Medicine, where he pursued research in clinical epidemiology. He subsequently completed his General Psychiatry Residency at the University of California, San Francisco (UCSF), where he was awarded an Area of Distinction in Clinical Neuroscience for his work integrating neuroscientific principles into the care of patients with brain tumors, dementia, neurodevelopmental disorders, and other neuropsychiatric conditions. He completed his Child and Adolescent Psychiatry Fellowship at Stanford University School of Medicine.

Dr. Hasassri is certified by the American Board of Psychiatry and Neurology in both Psychiatry and Child and Adolescent Psychiatry. His work is guided by a commitment to advancing compassionate, evidence-based psychiatric care through the integration of clinical neuroscience, innovative treatments, and individualized approaches to mental health.
