We are conducting an exciting new brain imaging study to help determine how the brain works at a molecular level.

**Participation in the study will involve:**
- Traveling to Stanford for 3 days
- Remaining still in a simulated scan session
- Cognitive testing
- Preparation for PET imaging
- Completion of a combined 1 hour PET/MRI scan

**The subject must be:**
- Between 18 and 55 years of age
- Healthy and without any psychiatric diagnosis
- IQ greater than 70

**Benefits of participating:**
- Results of the cognitive testing
- High resolution pictures of the brain
- An honorarium of $100 for participation
