Bio

CURRENT ROLE AT STANFORD

In my role as Chief Operating Officer and Associate Dean, I provide oversight and strategic leadership of the operations of the School of Medicine. This includes developing and leading the execution of major strategic initiatives and ensuring foundational operations are rigorous and effectively support the tripartite missions of Education, Research and Patient Care. I am a member of the Dean's leadership team and a representative of the School of Medicine in a variety of forums throughout Stanford and externally

I also co-lead the Stanford Medicine Catalyst program with Dr. Euan Ashley. We focus on discovering, supporting and propelling healthcare innovation from within the Stanford community. When these innovations are ready, we assist in the commercialization and scaling to reach maximum impact and improve human health. https://smcatalyst.stanford.edu

The combination of these roles provides a unique opportunity to work at the forefront of transformative health innovation and the operations of complex academic medical center ecosystem.
