Stanford

Teresa Perez

- Masters Student in Mechanical Engineering, admitted Autumn 2024
- Student Tour Guide, VIS

Bio

BIO

I am an undergraduate student studying Mechanical Engineering with an interest in sustainability. I am involved with the S4 lab under the Electrical Engineering department doing research in ocean sensing technology. I also have experience with Flight Club's Solar Airplane team developing aerodynamic components for a 2-meter wingspan autonomous airplane. Outside of my engineering pursuits, I work as a Stanford Tour Guide and a trip leader for the Outdoor Center.
