Stanford

Amirsaman Ashtari

Postdoctoral Scholar, Radiation Biology

Bio

BIO

I am a postdoctoral researcher at Stanford University, jointly supervised by Ash Alizadeh MD/PhD and Mohammad Shahrokh Esfahani PhD. I developed several AI solutions for the Computer Vision and Computer Graphic domains during my PhD studies at KAIST and ETH Zurich. My PhD research outcome was recognized by winning the Young Researcher Award, and I was eager to apply all those AI techniques to biological data for cancer therapy. In the Alizadeh and Esfahani labs, I will develop AI solutions and computational tools to better understand the tumor microenvironment. Outside of my research, I enjoy loving my family, playing the piano, and listening to music.

STANFORD ADVISORS

- Mohammad Shahrokh Esfahani, Postdoctoral Faculty Sponsor
- Ash Alizadeh, Postdoctoral Research Mentor
