Andres Medina

Graduate, Stanford Center for Professional Development

Bio

BIO

Andres Medina has a B.S. in Mechanical Engineering from San José State University. After graduating in December, 2024, he transitioned into the industry with a focus on precision testing.

Today, as an Associate Test Engineer at KLA Corporation, Andres handles optics integration on advanced KLA Tools that leave no room for error. His background is a blend of technical rigor and operational leadership, having previously managed teams in a general management capacity. Andres stays sharp by applying his mechatronics background to his career and maintaining a disciplined approach to health and personal growth.
