

## STANFORD UNIVERSITY RESEARCH

### *HEALTHY ADULTS*

**We are conducting an exciting new brain imaging study to help determine how the brain works at a molecular level.**

#### **Participation in the study will involve:**

- Traveling to Stanford for 3 days
- Remaining still in a simulated scan session
- Cognitive testing
- Preparation for PET imaging
- Completion of a combined 1hour PET/MRI scan

#### **The subject must be:**

- Between 18 and 55 years of age
- Healthy and without any psychiatric diagnosis
- IQ greater than 70

#### **Benefits of participating:**

- Results of the cognitive testing
- High resolution pictures of the brain
- An honorarium of \$100 for participation
