Bio

BIO

Dr. Levin is a board-certified, fellowship-trained ophthalmologist with the Stanford Health Care Byers Eye Institute. He is also a clinical instructor in the Department of Ophthalmology at Stanford University School of Medicine.

Dr. Levin has focused solely on plastic and reconstructive eye surgery since 1992. He evaluates and cares for conditions such as tear duct problems and eyelid problems, including eyelid growths and cancers. As an established expert, he uses the best techniques to improve eye health and confidence in facial appearance.

Dr. Levin has published research findings in many peer-reviewed journals, including the American Journal of Ophthalmology and Archives of Ophthalmology. He has also shared his expertise at numerous ophthalmology conferences and in books such as Contemporary Issues in Ophthalmology and Ophthalmic Surgical Procedures.

He is a fellow of the American Society of Ophthalmic Plastic and Reconstructive Surgery and the American Academy of Ophthalmology. He also has a long history of teaching about ophthalmic procedures at Stanford University School of Medicine.
