

Stanford

Lindsay Thomas, RN, MS, CNS

Professional Overview

BIO

Ms. Lindsay Thomas earned her BA in Integrative Biology from UC Berkeley in 2003 and her RN and MS from UCSF in 2006 and 2009 respectively. She completed a Double Master's in Cardiovascular Nursing and Genomics and is a board certified clinical nurse specialist in critical care nursing. She joined the Stanford Interventional Cardiology Team in 2011 where she has pioneered the advanced practice nursing role in the cath lab and been a leader in the development of the Left Atrial Appendage Closure program. She serves as adjunct faculty for the UCSF graduate nursing program and is the co-chair of the Northern California Chapter of the Preventative Cardiovascular Nurses Association. Lindsay specializes in treating and caring for patients with established coronary artery disease and cardiovascular risk factors; she strives to provide excellent patient care and education to optimize a heart healthy life style to promote wellness with use of medications and invasive procedures when life style alone is not enough to achieve desired results. When not working Lindsay is an outdoor and exercise enthusiast, who enjoys participating in various endurance activities and has completed several triathlons. She also enjoys reading and discussions with her book club, going to the theater, and spending quality time with her friends and family.
