Stanford

Leilani L Conradson

Contingent OTP 2, LCLS - Linac Coherent Light Source

Bio

BIO

Leilani Conradson is the Manager of the User Program Office for the Linac Coherent Light Source (LCLS), a U.S. Department of Energy Office of Science User Facility operated by Stanford University. She leads the office that serves as the primary interface between LCLS and its global community of more than 1,000 visiting researchers annually, overseeing user program operations and supporting the coordination of experiments conducted at the facility.

Conradson holds a bachelor’s degree in Chemistry and brings more than 24 years of experience in user facility administration, with perspective gained both as a scientific user and as a program manager. Prior to joining SLAC National Accelerator Laboratory, she worked at Los Alamos National Laboratory at the Los Alamos Neutron Science Center in New Mexico, where she served as a program manager and experiment coordinator beginning in 1999. She is currently based at SLAC in Menlo Park, California.

CURRENT ROLE AT STANFORD

LCLS User Program Office Manager
