Stanford

Anne Juliana Lockman

Adjunct Clinical Associate Professor, Psychiatry and Behavioral Sciences

Bio

BIO

Dr. Lockman is Adjunct Clinical Associate Professor of Neuropsychiatry in the Department of Psychiatry & Behavioral Sciences at Stanford. She directs the Functional Neurologic Disorder (FND) Track at La Selva in Palo Alto, within their state-of-the-art residential and partial hospitalization programs. She completed residencies in both Neurology at the University of Virginia and Psychiatry at Stanford Hospital & Clinics. Her clinical activities include providing pharmacologic and behavioral care for clients with psychiatric and behavioral conditions in the context of neurological illness, including epilepsy, stroke, movement disorders and others. Professional goals include the advancement of clinical care, research and access for clients suffering from neuropsychiatric conditions, including FND and related disorders.
