

Sufian Aldogom

Fall 2026 CSP Instructor TECH 84., Continuing Studies

Bio

BIO

Sufian Aldogom is an instructor at Stanford Continuing Studies, where he teaches agentic AI and explores how intelligent systems can reason, use tools, and transform work. He is a technology and AI leader with more than 15 years of experience across Google, Microsoft, Amazon, and Ericsson. He is also a Research Affiliate at MIT CSAIL and a Lead AI Instructor with MIT Beaver Works, has collaborated with researchers at Harvard Medical School, and has served as a NASA SARP mentor. His work spans agentic systems, healthcare, scientific discovery, and responsible AI, with a focus on translating advances in artificial intelligence into practical, trustworthy systems that augment human judgment and create meaningful real-world impact.

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

I thrive at the crossroads of tech and philosophy, diving into the mysteries of consciousness, life, quantum physics, and AI. Passionate about exploring the ethical dimensions of technology and its impact on humanity, I aim to bridge the gap between innovation and understanding.
