Bio

BIO

Dr. Bui is a Clinical Associate Professor of Medicine at the Stanford Cancer Institute and a specialist in Sarcoma. Dr. Bui earned an undergraduate degree in Computer Science at Stanford University and went on to earn his medical degree from the University of Texas Southwestern Medical Center. He completed Internal Medicine residency at Stanford Hospital and Hematology/Oncology fellowship at the University of California San Diego, where he performed extensive research in bioinformatics to analyze tumor sequencing data.

He is involved in numerous sarcoma clinical trials, leading efforts to take new therapeutics from the lab to clinical practice. His research background and interests are in the field of bioinformatics as applied to large data sets and the study of novel compounds in rare malignancies. He also is involved in education at the Stanford University School of Medicine, serving as a lecturer and mentor to medical students, residents, and oncology fellows. Dr. Bui is the founding Editor-in-Chief of the journal “Current Problems in Cancer: Case Reports”, an international, peer-reviewed journal that publishes groundbreaking cases that give insight into redefining concepts in cancer. He also serves as the Chair of the Data Safety Monitoring Committee at the Stanford Cancer Institute, overseeing the board that reviews all investigator-initiated cancer trials run at Stanford.
