#### BIO

Dr. Mullady is a board-certified neurologist providing care at Stanford Health Care's Memory Disorders Center. She completed a memory and aging fellowship at the University of California, San Francisco. She is currently a clinical assistant professor in the Department of Neurology and Neurological Sciences at Stanford University School of Medicine.

Dr. Mullady specializes in memory disorders and aging. She has a particular interest in caring for homeless patients with neurological conditions. She currently serves as community engagement lead in the division and has been pivotal in creating unique pathways of access to healthcare for underserved patients in the Bay Area.

She is passionate about educating both patients and colleagues. She serves as associate program director of the memory/behavioral neurology fellowship.

Dr. Mullady excels in community outreach, health advocacy, and leadership. She is also co-director of the new multi-disciplinary Frontotemporal Dementia (FTD) clinic, which seeks to provide patients access to timely diagnosis, advocacy, and intervention. She has organized and directed outreach programs at women's shelters, clinics for the homeless, and an alcohol and drug rehabilitation center. She has also developed programs to encourage childhood reading at home and to educate underserved communities about neurodegenerative disorders.

She has published peer-reviewed articles in *Frontiers of Neurology* that report her research on the effects of homelessness on neurocognitive health. She has also presented posters at regional and national conferences on the topics of interprofessional health coaching and the effects of homelessness on mental function.

#### CLINICAL FOCUS

- Neurology

- frontotemporal dementia
- health equity
- neurodegenerative disease
