Serena Bidwell
Temp - Non-Exempt, Health Services Research Unit

Bio

Serena Bidwell, MPH is a social science researcher at the Stanford Surgery Policy Improvement Research & Education (S-SPIRE) center. She completes a range of activities from project coordination to data analysis and results reporting. Her interests include long-term management of childhood chronic diseases, quality of life in cancer patients, and healthcare infrastructure in developing countries. She completed a master's degree in global health epidemiology and has coupled her academic training with experience as an editorial assistant for a scientific journal and as a child health outcomes analyst. She is committed to community service and implemented a medical outreach program, with a focus in surgery, to local low-income and minority high school students.
