

Stanford

Shady Younis

Instructor, Medicine - Immunology & Rheumatology

Bio

BIO

Shady Younis, PhD is an instructor at the division of Immunology and Rheumatology at Stanford University. He received his PhD in Medical Sciences from Uppsala University in Sweden. He later joined Dr. William Robinson's Lab at Stanford University as Wallenberg postdoctoral fellow, where he characterized the pathogenic role of cytotoxic CD8+ T cells in rheumatoid arthritis. His current research aimed at elucidating the underlying triggers of pathogenic B cell responses in a spectrum of autoimmune diseases, including systemic lupus erythematosus (SLE), rheumatoid arthritis (RA), and multiple sclerosis (MS). He uses computational methodologies alongside cutting-edge high-throughput sequencing technologies to characterize the autoreactive B and T cells. The overarching research objective of his research is to unravel the mechanistic roles of Epstein-Barr Virus (EBV) reactivation in activating and transforming autoreactive B cells in the development of autoimmunity.

ACADEMIC APPOINTMENTS

- Instructor, Medicine - Immunology & Rheumatology

PROFESSIONAL EDUCATION

- PhD, Faculty of Medicine, Uppsala University , Medical Sciences (2018)
- MSc, Vienna University of Life Sciences , Quantitative Genetics (2011)
- MSc, SLU, Sweden , Molecular Genetics (2011)

PATENTS

- Shady Younis, Wael Kamel, Göran Akuslarvi, Leif Andersson. "Sweden Patent WO2018143874A1 Methods for identifying new therapeutic agents", Jan 30, 2018

Publications

PUBLICATIONS

- **EBV reprograms autoreactive anti-CNS B cells as antigen presenting cells in multiple sclerosis.** *bioRxiv : the preprint server for biology*
Younis, S., Rasouli, S., Loeffler, J. W., Sattarnejad, N., Courtney, Y., Moutusy, S. I., Jahanbani, S., Pandit, M., Tomczak, A., Wong, H. H., Sharpe, O., Utz, P. J., Meffre, et al
2026
- **Epstein-Barr virus reprograms autoreactive B cells as antigen-presenting cells in systemic lupus erythematosus.** *Science translational medicine*
Younis, S., Moutusy, S. I., Rasouli, S., Jahanbani, S., Pandit, M., Wu, X., Acharya, S., Sharpe, O., Wijeratne, T. U., Harris, M. L., Yang, E. Y., Chaichian, Y., Parsafar, et al
2025; 17 (824): eady0210

- **Microbial activation of cytotoxic CD8⁺ T cells promotes skin immunerelated adverse events in patients treated with immune checkpoint inhibitors**
Younis, S., Acharya, S., Swaminathan, G., Wong, H., Kim, H., Eschholz, A., Hegde, S., McKnight, A., Robinson, W., Zaba, L.
WILEY.2025: 2171-2174
