Margaret Zhou

- Masters Student in Epidemiology and Clinical Research, admitted Autumn 2021
- Fellow in Medicine

Publications

**PUBLICATIONS**

- **Type II Achalasia Is Increasing in Prevalence.** *Digestive diseases and sciences*
  Zhou, M. J., Kamal, A., Freedberg, D. E., Markowitz, D., Clarke, J. O., Jodorkovsky, D.  
  2020

- **Symptoms and demographic factors associated with early-onset colorectal neoplasia among individuals undergoing diagnostic colonoscopy.** *European journal of gastroenterology & hepatology*
  Krigel, A., Zhou, M., Terry, M. B., Kastrinos, F., Lebwohl, B.  
  2020; 32 (7): 821-826

- **Clinicopathologic Characteristics and Impact of Oophorectomy for Ovarian Metastases from Colorectal Cancer.** *The oncologist*
  2020; 25 (7): 564-571

- **Patient and Physician Factors Associated with Adenoma and Sessile Serrated Lesion Detection Rates.** *Digestive diseases and sciences*
  Zhou, M. J., Lebwohl, B., Krigel, A.  
  2020

- **The local hospital milieu and healthcare-associated vancomycin-resistant enterococcus acquisition.** *The Journal of hospital infection*
  Zhou, M. J., Li, J., Salmasian, H., Zachariah, P., Yang, Y. X., Freedberg, D. E.  
  2019; 101 (1): 69-75

- **Pathogen colonization of the gastrointestinal microbiome at intensive care unit admission and risk for subsequent death or infection.** *Intensive care medicine*
  2018; 44 (8): 1203-1211

- **Squamous cell carcinoma of unknown primary of the head and neck: Favorable prognostic factors comparable to those in oropharyngeal cancer.** *Head & neck*
  2018; 40 (5): 904-916

  2015; 51 (16): 2465-72

- **A Drug Repositioning Approach Identifies Tricyclic Antidepressants as Inhibitors of Small Cell Lung Cancer and Other Neuroendocrine Tumors** *CANCER DISCOVERY*
  2013; 3 (12): 1364-1377

- **Walking impairment questionnaire improves mortality risk prediction models in a high-risk cohort independent of peripheral arterial disease status.** *Circulation. Cardiovascular quality and outcomes*
  2013; 6 (3): 255-261

• Exercise capacity is the strongest predictor of mortality in patients with peripheral arterial disease. *Journal of Vascular Surgery* 2013; 57 (3): 728-733

• The Walking Impairment Questionnaire Predicts Total and Cardiovascular Mortality Independent of Peripheral Artery Disease Status. *Lippincott Williams & Wilkins*. 2012

• Exercise capacity is the strongest predictor of mortality in patients with peripheral arterial disease. *Sage Publications Ltd*. 2012: 204-5
