Bio

BIO

Dr. Graglia, the youngest of four in an immigrant family, grew up in Southern California. Considering veterinary medicine, journalism, architecture, and Disney animation, Dr. Graglia 'discovered people' during a summer in undergrad working in Ethiopia, decided on medicine as her path forward, and has never looked back.

A UC child, she completed her undergraduate studies at UC Berkeley, medical school at UC Davis, and residency at UCSF with deviations to the Johns Hopkins Bloomberg School of Public Health for a Masters of Public Health and Massachusetts General Hospital (MGH) for fellowship in Emergency Ultrasound.

Having worked, learned, and/or taught throughout Africa, Europe and Eastern Europe, and Central and South America, her three pillars continue to be point-of-care ultrasound (POCUS), education, and global health with an unending drive to serve the underserved.

Outside of work, Dr. Graglia enjoys her growing family, yoga, hiking, being outside, and exploring - new cultures, places, and languages.
