Bio

Haifa Badi-Uz-Zaman is a Program Manager at the Stanford Institute for Human-Centered Artificial Intelligence, where she leads education initiatives that have a diversity, equity, and inclusion focus. Her portfolio includes HAI's courses, fellowships, and convenings on race and technology, arts and technology, AI education for K-12 audiences, and AI application in global contexts.

She is passionate about centering perspectives from minoritized communities in technology design and application, particularly voices from developing countries in Asia and Africa. At Stanford, Haifa has also managed research projects at the Cyber Policy Center and the Center on Philanthropy and Civil Society. She has previously worked with Citizen Schools in California and the Aga Khan Development Network in Kenya. Haifa has a bachelor’s degree in journalism from the American University of Sharjah in the United Arab Emirates and a master’s degree in international education policy from Harvard University. As a first-generation college graduate from a Pashtun family who was born and raised in the Middle East, Haifa is a strong believer in the transformative power of education in empowering underrepresented communities and bridging cultural divides.
