

Manasvi Anant Marathe

Administrative Services Administrator 3, Peds/CDCM Center for Definitive and Curative Medicine

Bio

BIO

Manasvi Marathe is a Senior Discovery Stage Project Manager at the Center for Definitive and Curative Medicine (CDCM) at Stanford University School of Medicine. In this role, she oversees a diverse portfolio of projects and programs within the genome-editing platform, applying her clinical research expertise and project management acumen to support clinical investigators in achieving their project milestones and goals.

With a foundational career as a dentist in India, she brings a unique perspective to her work, underscored by her commitment to patient care. Her aspiration to impact healthcare on a broader scale led her to pursue a Master's in Public Health from NYU, marking her transition into clinical research. Throughout her career, she has contributed to a wide array of studies, including epidemiological research, medical device trials, and groundbreaking cell and gene therapies at prestigious institutions such as Harvard T H Chan School of Public Health, NYU Medical School and College of Dentistry, and Stanford University.

Throughout her career, she has demonstrated the ability to lead complex research initiatives and foster collaborations with prominent funding sources like NIH, CIRM, and tech industry leaders such as Apple.
