Darvin Scott Smith
Casual - Academic Staff, Microbiology and Immunology

Bio

BIO
Darvin (Scott) Smith graduated in biochemistry from Bowdoin College in Maine and went on to study tropical public health at Harvard School of Public health before attending medical school in his home state of Colorado, where he grew up. He worked on developing diagnostic tests and epidemiology (Leishmania and Onchocerciasis) in Cali Colombia on a Fulbright scholarship before finally moving to California where he completed residency at Stanford Medical School, then a Fellowship in Infectious Disease & Geographic Medicine. He now serves as Chief of the Dept of Infectious Disease at Kaiser Permanente in Redwood City California, and he teaches several classes at Stanford.

Scott volunteers as a community neighborhood network lead in Hillsborough and works with international disaster response to vector borne disease threats as a clinical lead for MENTOR-Initiative around the world (Indonesia, Myanmar, Tanzania, Kenya, Haiti, Thailand). Scott enjoys gardening, sustainable household development, photography and wants to do a triathlon...
