### Research & Scholarship

---

#### RESEARCH INTERESTS

- Philosophy

#### CURRENT RESEARCH AND SCHOLARLY INTERESTS

Most of my work is in ethics, and spans topics in moral and political philosophy as well as the philosophy of law. I am especially interested in the ethics of rescue and other-defence, the thrills and challenges of non-consequentialist ethics, theories of justice, and – increasingly inescapably – how debates about AI might throw new light on longstanding questions about rights, reasons, and agency. Much of my works falls in areas where these fields overlap.

## Teaching

---

### COURSES

#### 2025-26

- Adventures in Non-Consequentialist Ethics: PHIL 370E (Win)
- Capstone Seminar: When Bad People Create Beautiful Things: PHIL 194E (Win)
- Ethics Beyond Consequences: PHIL 174, PHIL 274 (Aut)
