Stanford

Huijun Ring, Ph.D.

Adjunct Professor, Psych/Major Laboratories and Clinical & Translational Neurosciences Incubator

Bio

BIO

Dr. Huijun Ring received her PhD in molecular biology and genetics from Cornell University and completed her post-doctoral medical genetics training at Stanford University School of Medicine. She is a clinical molecular geneticist and board-certified by the American Board of Medical Genetics.

Dr. Ring is an experienced biotech entrepreneur and executive. Previously she worked at Incyte Pharmaceuticals and DNA Direct in Silicon Valley. She was the founder and CEO of iDNA Inc, a precision medicine company. iDNA Inc. was named as one of the fastest growing technology companies in China by Deloitte and was acquired by a public company. She has also cofounded and advised several biotech startups in Silicon Valley and mentored many first-time entrepreneurs.

Currently, Dr. Ring works on genomic medicine, AI health and longevity research. She mentors students from the Stanford Graduate School of Business, and junior women faculty in science and medicine through the Stanford University Faculty Development Office. Additionally, Dr. Ring teaches the course MED 272: Science and History of Traditional Chinese Medicine and MED 132: Exploring Chinese Medicine. Dr. Ring is co-founder of Stanford Hub for AI Wellbeing and Longevity.
