

## Manan Arya

Assistant Professor of Aeronautics and Astronautics

 Curriculum Vitae available Online

### Bio

---

#### BIO

Manan Arya leads the Morphing Space Structures Lab. His research is on shape-changing structures, including spacecraft structures that are folded for launch and then unfolded in space, and also morphing robots. Previously, he was a technologist in the Advanced Deployable Structures Group at the Jet Propulsion Laboratory (JPL), which is managed for NASA by Caltech.

#### ACADEMIC APPOINTMENTS

- Assistant Professor, Aeronautics and Astronautics

#### PROFESSIONAL EDUCATION

- PhD, California Institute of Technology (2016)
- Masters, California Institute of Technology (2012)
- BAsC in Engineering Science, University of Toronto (2011)

#### LINKS

### Research & Scholarship

---

#### CURRENT RESEARCH AND SCHOLARLY INTERESTS

Manan Arya leads the Morphing Space Structures Laboratory. His research is on structures that can adapt their shape to respond to changing requirements. Examples include deployable structures for spacecraft that can stow in constrained volumes for launch and then unfold to larger sizes in space, terrestrial structures with variable geometry, and morphing robots. Key research thrusts include lightweight fiber-reinforced composite materials to enable innovative designs for flexible structures, and the algorithmic generation of the geometry of morphing structures – the arrangement of stiff and compliant elements – to enable novel folding mechanisms.

He has published more than 20 journal and conference papers and has been awarded 5 US patents. Prior to joining Stanford, he was a Technologist at the Advanced Deployable Structures Laboratory at the Jet Propulsion Laboratory, California Institute of Technology, where he developed and tested breakthrough designs for space structures, including deployable reflectarrays, starshades, and solar arrays.

## Teaching

---

### COURSES

#### 2025-26

- Analysis of Structures: AA 240B (Spr)
- Introduction to Aeronautics and Astronautics: AA 100 (Aut)

#### 2024-25

- Introduction to Aeronautics and Astronautics: AA 100 (Aut)
- Spacecraft Design Laboratory: AA 236B (Win)
- Stability of Structures: AA 245 (Spr)

#### 2023-24

- Introduction to Aeronautics and Astronautics: AA 100 (Win)
- Spacecraft Design: AA 236A (Aut)
- Stability of Structures: AA 245 (Spr)

#### 2022-23

- Introduction to Aeronautics and Astronautics: AA 100 (Win)
- Spacecraft Design: AA 236A (Aut)
- Stability of Structures: AA 245 (Spr)

### STANFORD ADVISEES

#### Doctoral Dissertation Reader (AC)

Faisal As'ad, Kai Jun Chen, Enquan Chew, Jeffrey Durrant

#### Doctoral Dissertation Advisor (AC)

Emily Ellison, Hannah Fisher, Alexandra Haraszti, Connie Liou, Kevin Murillo

#### Master's Program Advisor

Malek Abu-Shawish, Evan Alfandre, Brian Check, Kadin Hendricks, Zain Jamal, Victoria Porto, Siddarth Ramasubramanian, Andy Solganik, Anjali Vu, Brad Yac-Diaz

## Publications

---

### PUBLICATIONS

#### • Adaptive Stiffness and Shape Control of a Modular Origami-Inspired Robot

Ochalek, M., Haraszti, A., Arya, M.  
edited by Lu, G., You, Z., Assis, M.  
SPRINGER-VERLAG SINGAPORE PTE LTD.2026: 83-98

#### • Regular and Semi-regular Tessellations of Origami Flashers

Jatusripitak, N., Arya, M.  
edited by Lu, G., You, Z., Assis, M.  
SPRINGER-VERLAG SINGAPORE PTE LTD.2026: 211-224

#### • Origami-Inspired Structural System for in-Space Assembly

Ochalek, M., Formoso, O., Arya, M., Cheung, K., IEEE  
IEEE.2025
