

Negin Yavari

Visiting Scholar, Ophthalmology Research/Clinical Trials

Bio

BIO

Negin Yavari, MD, is a physician-scientist and Visiting Scholar at the Byers Eye Institute at Stanford University School of Medicine. She received her Doctor of Medicine degree from Tehran Azad University of Medical Sciences in 2017. Her research focuses on advancing diagnostic and therapeutic strategies in ophthalmology, with particular emphasis on ocular inflammatory diseases and retinal vasculitis. Through clinical and translational investigation, including the application of machine learning in ophthalmic imaging, she seeks to improve diagnostic precision, optimize treatment strategies, and reduce the long-term burden of vision loss.

Boards, Advisory Committees & Professional Organizations

- Founding Member, Society for AI in Vision and Ophthalmology (2025–Present)
- Member, Foster Ocular Immunology Society (2025–Present)
- Member, American Academy of Ophthalmology (2023–Present)
- Member, Association for Research in Vision and Ophthalmology (2021–Present)
