Publications

PUBLICATIONS

- **Endosome-associated Rab GTPases control distinct aspects of neural circuit assembly.** *eLife*
  Dong, K. X., Zhang, Y., Ji, H., Luginbuhl, D. J., Luo, L., McLaughlin, C. N.
  2026; 14
- **Heterophilic interactions between cell-surface proteins Teneurin-m and Capricious drive dendrite segregation in the Drosophila olfactory circuit.** *Current biology : CB*
  Ji, H., Li, J., Xu, Y., Wong, K. K., Wu, Y., Luginbuhl, D. J., Zhang, Y., Li, Z., Lee, J., Jones, R. C., Quake, S. R., Araç, D., Özkan, et al
  2026
- **Endocytome profiling uncovers cell-surface protein dynamics underlying neuronal connectivity.** *Neuron*
  McLaughlin, C. N., Ji, H., Dong, K. X., Xu, C., Wong, K. K., Li, Z., Luginbuhl, D. J., Xu, C., Lyu, C., Qin, W., Li, J., Udeshi, N. D., Carr, et al
  2026
- **Endosome-associated Rab GTPases control distinct aspects of neural circuit assembly.** *bioRxiv : the preprint server for biology*
  Dong, K. X., Ji, H., Luginbuhl, D. J., Luo, L., McLaughlin, C. N.
  2025
