Stanford

Grant Long

Ph.D. Student in Earth and Planetary Sciences, admitted Autumn 2024

Bio

BIO

Grant was born in a small town in Massachusetts and quickly moved to York, Maine, a small beach town. He earned a BSc in Geology from the University of Vermont in 2022. Grant continued with his MSc degree at Stanford University in 2024, focusing on sediment dynamics in Chile.

Grant joined Stanford as an MSc student in the Fall of 2022 and is a part of the Tectonic Geomorphology Lab group led by George Hilley.

Grant's focus is on landscape evolution in south-central Chile, making comparisons between the modern and glacial-interglacial timescales.

EDUCATION AND CERTIFICATIONS

- MSc, Stanford University , Geological Sciences (2024)
- BS, University of Vermont , Geology (2022)
