

Candice Hwang

- Clinical Assistant Professor, Medicine
- Masters Student in Epidemiology and Clinical Research, admitted Autumn 2026

Bio

BIO

Dr. Candice Hwang is a Clinical Assistant Professor in the Stanford Division of Hospital Medicine with a passion for improving healthcare in low-resource settings around the world. She completed medical school at Northwestern University, during which she became an NIH Fogarty Global Health Fellow and studied the impact of health policy changes for pregnant women living with HIV in South Africa. She then completed residency at Stanford University, where she created a rotation abroad in Guangzhou, China, to study the uptake of doxycycline post-exposure prophylaxis to decrease rates of sexually transmitted infections among men who have sex with men. Currently, Dr. Hwang is pursuing a Master's in Epidemiology at Stanford University to continue expanding her research in China, with a focus on using digital health interventions to improve primary care quality in rural Dali.
