#### BIO

Dr. Anand Athavale is a board-certified, fellowship-trained vascular medicine specialist with Stanford Health Care Vascular and Endovascular Care. He is also a clinical assistant professor in the Department of Surgery, Division of Vascular Surgery at Stanford University School of Medicine.

Dr. Athavale cares for people with conditions of the veins and lymphatic system, including chronic venous disease, blood clots, and poor blood flow in the legs. He is skilled in using less invasive procedures to treat vein problems and helps patients manage their overall vascular health.

His research looks at new and better ways to treat vein disease, test new closure techniques, and use tools such as artificial intelligence to improve care. His research efforts have earned him grants and scholarships from organizations such as the Society for Vascular Medicine and American Venous Forum.

Dr. Athavale has published many studies in peer-reviewed medical journals, including the Journal of Vascular Surgery and Indian Journal of Critical Care Medicine. He has also written chapters for medical textbooks on topics such as lung infections and infections related to HIV. Additionally, he has shared his work at major medical conferences in the United States and abroad, including the annual scientific sessions of the Society for Vascular Medicine.

Dr. Athavale is a member of the Society of Vascular Medicine and the American Venous Forum.
