Bio

BIO

I am a 2nd year Ph.D. student in Electrical Engineering at Stanford University, advised by Brian Hargreaves and Akshay Chaudhari. I received my M.Sc. and B.Sc. in Electrical and Electronics Engineering at Bilkent University, where I was fortunate to work with Tolga Cukur My interests lie in the intersection of machine learning, signal processing, computational MR imaging, and healthcare. Recently, I've been working on developing mathematical tools to improve explainability of image reconstruction algorithms.

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

My current research centers on developing mathematical tools to enhance the explainability of image reconstruction algorithms in computational magnetic resonance imaging (MRI). By integrating principles from machine learning, signal processing, and generative models, I aim to improve the transparency and reliability of AI applications in medical imaging.
