

Hanfeng Zhai

Ph.D. Student in Mechanical Engineering, admitted Autumn 2023

Bio

BIO

I study mechanics of materials using computer simulations across multiple length and time scales. I am currently working on understanding how material defects and microstructures govern macroscopic mechanical behaviors. This includes constructing plasticity theory from statistics of dislocations, homogenization theory of digital rocks, and developing data-driven methods for multiscale simulations.

I did Research Interns at Mitsubishi Electric Research Labs (working on machine learning for dynamical and energy systems) and Tokyo Electron (working on computational modeling of semiconductor manufacturing).

I am currently teaching (TA & co-lecture) for Elasticity & Inelasticity (ME340). I served as the TA for Finite Element Method (ME335A).

EDUCATION AND CERTIFICATIONS

- M.S., Cornell University , Mechanical Engineering (2023)
- B.S., Shanghai University , Theoretical and Applied Mechanics (2021)

LINKS

- Personal Web: <https://hanfengzhai.github.io>

Research & Scholarship

LAB AFFILIATIONS

- Wei Cai, Micro & Nano Mechanics Group (9/6/2023)

Professional

WORK EXPERIENCE

- Research Intern - Institute of Mechanics, CAS (May 2021 - August 2021)
- Research Scientist Intern - Tokyo Electron (May 2023 - August 2023)
- Research Intern - Mitsubishi Electric Research Labs (June 15, 2025 - September 12, 2025)
