Stanford

Caroline Scheuing

Ph.D. Student in Molecular and Cellular Physiology, admitted Autumn 2023

Publications

PUBLICATIONS

- **EMC chaperone activity is required for cotranslational calcium channel assembly.** *Nature structural & molecular biology*
  Stanton, M., Scheuing, C. E., Biswal, M., Singal, B., Agarwal, M., Vargas, G. D., Gao, A., Brademan, D. R., Hüttenhain, R., Gifford, C. A., Pleiner, T.
  2026

- **Epilepsy and sudden unexpected death in epilepsy in a mouse model of human SCN1B-linked developmental and epileptic encephalopathy.** *Brain communications*
  Chen, C., Ziobro, J., Robinson-Cooper, L., Hodges, S. L., Chen, Y., Edokobi, N., Lopez-Santiago, L., Habig, K., Moore, C., Minton, J., Bramson, S., Scheuing, C., Daddo, et al
  2023; 5 (6): fcad283

- **Neonatal Scn1b-null mice have sinoatrial node dysfunction, altered atrial structure, and atrial fibrillation.** *JCI insight*
  Ramos-Mondragon, R., Edokobi, N., Hodges, S. L., Wang, S., Bouza, A. A., Canugovi, C., Scheuing, C., Juratli, L., Abel, W. R., Noujaim, S. F., Madamanchi, N. R., Runge, M. S., Lopez-Santiago, et al
  2022; 7 (10)
