

## Sha Sajadieh

AI Index Lead, Institute for Human-Centered Artificial Intelligence (HAI)

---

### Bio

#### BIO

Sha leads the AI Index at the Stanford Institute for Human-Centered Artificial Intelligence (HAI). The Index is a program built on longitudinal frameworks to measure AI's global trajectory. It also produces the Global AI Vibrancy Tool, an interactive platform that enables cross-country comparisons of AI activity across dozens of indicators.

In her role, Sha manages the direction and development for the AI Index Report, alongside the AI Index Steering Committee, an interdisciplinary group of experts from across academia and industry. The report is used by policymakers and global industry leaders, and has been cited in major outlets including The New York Times, Bloomberg, and The Guardian.

Before joining Stanford HAI, Sha spent nearly a decade in product leadership roles at companies like Google and Netflix, building consumer and enterprise products in media and entertainment.

Sha holds a B.A. in Interdisciplinary Studies from the University of California, Berkeley.
