Stanford

Murilo Guedes

Fellow in Medicine - Med/Nephrology

Bio

BIO

Murilo Guedes, MD, PhD, is a Fellow in Medicine within the Department of Nephrology and part of the Translational Investigator Program (TIP) within the Department of Medicine at Stanford.

Dr. Guedes's research is dedicated to improving the lives of patients with chronic kidney disease. His work draws on clinical epidemiology, international patient cohorts, and clinical trials to identify opportunities to improve care across the spectrum of kidney disease. A central focus is understanding how anemia and iron deficiency relate to cardiovascular outcomes, survival, physical function, and quality of life, including the implications of iron deficiency beyond anemia.

His research also examines how dialysis treatments and differences in clinical practice relate to patients' health and daily experiences, with particular attention to fatigue, physical activity, and recovery after dialysis. His broader work explores gaps in kidney disease detection, risk assessment, and treatment. Across these efforts, he aims to translate clinical evidence into practical strategies that reduce the burden of kidney disease and help patients live longer, healthier lives.

Publications

PUBLICATIONS

- **Authors' reply to "Residual confounding in the prognostic interpretation of iron deficiency in incident peritoneal dialysis".** *Peritoneal dialysis international : journal of the International Society for Peritoneal Dialysis*
  Rigodon, V., Guedes, M., Pecoits, P. G., Hartley, B., Jiao, Y., Usvyat, L. A., Chatoth, D. K., Hymes, J. L., Maddux, F. W., Kooman, J., Moraes, T. P., Raimann, J. G., Kotanko, et al
  2026: 8968608261476550

- **Multinational Real-World Practice Patterns in the Use of Antithrombotic Therapy Among Patients on Hemodialysis and Peritoneal Dialysis.** *Kidney medicine*
