

## Barathi Subramanian

Postdoctoral Scholar, Pathology

### Bio

---

#### BIO

My research lies at the intersection of computer vision and deep learning, focusing on the development of intelligent systems to advance large-scale image analytics in computational pathology, emphasizing histopathology-based survival analysis, whole slide image classification, and multi-modal representation learning. Through this research, I aim to bridge perceptual understanding and medical reasoning, enabling models to achieve high predictive accuracy and offer clinically interpretable insights for precision medicine.
