Joseph Le

Undergraduate, Computer Science

Bio

BIO

Undergraduate student in Computer Science (Systems and AI Track)

Currently Apple, Vimes, and Carta Lab.

Ex Neurotrack, Stanford CS TA, Bonterra Tech, Bases Insight, and AiGo Learning.

Stanford CS + Social Goods - Vice President

About me:

I'm Joseph, a CS student at Stanford who likes building things that actually get used. Most of my work lives somewhere between full-stack systems and applied ML, whether that's infrastructure for a cross-agency welfare platform at Vimes, research on early dementia detection at Neurotrack, or the course planner a lot of Stanford students use through Carta. On campus, I teach CS 106B and help run CS + Social Goods, where we build software for nonprofits. Outside of work, I'm usually cooking, hiking, or playing basketball. My favorite projects tend to be the personal ones, those live on my portfolio below.
