Stanford

Vinny Anderson

- Undergraduate, Math and Computational Science
- Stanford Student Employee-3, Psychology
- Undergraduate, Psychology

Bio

BIO

The contexts that bring societies together govern our interactions in ways that are as tragic as they are beautiful. My dedication to understanding the social experience is grounded not only in a love for academia, but in compassion: what we know only matters as much as our capacity to use it to make a difference in the lives of others. I believe that this is remarkably evident in Psychology, Data Science and Social Systems, and Public Policy. By studying the gaps between disciplines, I hope to better understand the persistent psychological impact of policy initiatives and systemic prejudices in the real world. This passion has informed the research I have pursued with the SPARQ Lab at Stanford and the Social Context and Inequity Lab at the University of Denver, as well as my community-oriented work with the Haas Center for Public Service as the Frosh Service Liaison Coordinator, a fellow with Leadership, Organizing, and Action, and a fellow for Matriculate.
