Casual Employee, Medicine - Primary Care and Population Health

Bio

BIO

Bhabna Banerjee is an illustrator and data journalist based in Vancouver, Canada. She graduated from York University with a BFA in Media Production and Visual Journalism and was named The Global Leader of Tomorrow Scholar from the class of 2020. Her interests include environmental policy, biodiversity loss, climate migration, and extreme weather. She has previously covered climate and environmental issues for publications such as Forbes, World Economic Forum, El Tecolote, Courier International, and the Knight Foundation. In 2022, she founded Planet Anomaly to improve climate literacy and make environmental news more accessible through illustrated data visualizations. Since then, she has helped environmental organizations communicate their data and research and has collaborated with the Rocky Mountain Institute, Climate Central, Datawrapper, and Down to Earth. At Stanford, she will continue to develop innovative ways of visual storytelling that make climate reporting more comprehensible.
