

Prerana Gawde

Ph.D. Student in Oceans, admitted Autumn 2024

Bio

BIO

Prerana is a marine ecologist with over five years of experience working closely with fisher communities and recreational SCUBA divers in Lakshadweep, India, conducting ecological assessments of fishery-important small pelagic baitfish and collaborating with fishers to document traditional ecological knowledge for community-led fisheries management. Currently pursuing a PhD at Stanford University's Department of Oceans, she is exploring the ecological interactions of shipwrecks and their role in socio-ecological systems through interdisciplinary research frameworks.
