

Stanford

Kyle Lottinville

- MBA, expected graduation 2026
- Masters Student in Environment and Resources, admitted Spring 2026

Bio

BIO

I'm a Stanford MBA focused on advancing climate solutions, with a passion for scaling renewables, sustainable infrastructure, and energy storage.

Before Stanford, I led large-scale energy and manufacturing projects around the world. At ExxonMobil, I managed a \$400M drilling program in Russia, delivering some of the world's longest wells and driving technical innovations that broke multiple drilling performance records. After ExxonMobil, I joined Tesla's Gigafactory in Austin, where I led a 25-person team scaling infrastructure to deliver first-of-its-kind, high-volume 4680 battery production.

I consider myself a diplomatic leader who has effectively built relationships and worked alongside individuals from all around the world.

International experiences to include work, study abroad, and travel across 35+ countries and 6 continents.

In my spare time, I enjoy hiking, travel, smoking briskets, and golfing. I'm also working on my private pilot's license.
