Bio

BIO

Berrin Er, M.D., is a physician and visiting scholar in the Division of Pulmonary, Allergy, and Critical Care Medicine. She graduated from Istanbul University Faculty of Medicine and completed her residency training as well as a critical care fellowship at Hacettepe University, Ankara, Turkey.

As a visiting researcher, Dr. Er integrates her clinical expertise with advanced computational methods. Her research focuses on interstitial lung diseases, with an emphasis on radiomics, and on analyzing diverse datasets related to respiratory diseases using data-driven approaches. Her work aims to enhance disease characterization and support clinical decision-making.
