Bio

BIO

I am a Clinical Data Scientist at a UK healthcare organisation based in London and am also affiliated with Stanford Hospital and Stanford School of Medicine. I specialize in AI engineering, particularly the application of AI to unstructured clinical notes, and have additional experience working with medical imaging data. Previously, I was a data scientist in Stanford Health Care and a Visiting Faculty (Lecturer) at Dartmouth College, where I taught undergraduate statistics. I have also worked as a short-term consultant at the World Bank during 2022-2024.
