Stanford

Zach Lannes

Engineering Librarian, Research & Teaching Support, Engineering Library

Bio

BIO

Hello! I am the Engineering Librarian for Research & Teaching Support. Put simply, I help patrons of all levels learn how to use the myriad resources (books, databases, code, makerspace, and more!) in the Terman Library. Please feel free to reach out to me with any questions about our space, tools, and/or collections!

In my own academic work I am interested in outreach and instruction, and both these activities' relationships to new technology. I also am working on a research project related to credentialing in academic libraries.

EDUCATION AND CERTIFICATIONS

- MLIS, Louisiana State University (2022)
- BA, Texas A&M University , Mathematics (2017)
