

Matthew Thomas Bouchard

Graduate, Stanford Center for Professional Development

Bio

BIO

Matthew graduated from University of California, Davis studying Electrical and Computer Engineering. After graduating he worked in the visual effects film industry working at the premier companies of George Lucas' Marin county based Industrial Light and Magic and Peter Jackson's New Zealand based "Weta Digital" where he contributed to 8 Academy of Motion Pictures and Arts Visual Effects nominated films and 2 winners (Avatar, Pirates of the Caribbean 2).

Having completed his dream of working in film he more recently has focused on turning science fiction ideas of AR/VR and AI/ML into reality at companies like Apple, Microsoft, and Meta.
