

Stanford

Jamie Hsin, PA-C

Professional Overview

BIO

Jamie was raised in Central Valley, California, in Turlock. She completed her Master of Physician Assistant Practice at the University of Southern California, where she was awarded a membership of the Pi Alpha Honor Society. Her passion for cardiothoracic surgery started while she was a clinical volunteer on the cardiac surgical floor and solidified when she completed her senior clinical rotation in Cardiac Surgery at Keck Hospital of USC.

She deeply values education, both as a learner and as a teacher. As a Health Educator with the UCLA Community Training Center, her goal was to enable healthcare students to excel and contribute positively to patient care. In addition, she has been actively involved in mentorship initiatives that empower individuals from underserved communities to pursue higher education and healthcare careers. Her other values include compassion, collaboration, and hard work, which she is eager to utilize while practicing evidence-based medicine as a Cardiothoracic Surgery APP fellow. Outside of her professional commitments, Jamie enjoys hot yoga, hiking, traveling, and snowboarding. This winter, she is looking forward to being closer to Tahoe's world-class slopes.
