Bio

BIO

Julia Fridman Simard, ScD, is an Associate Professor of Epidemiology & Population Health, and of Medicine in Immunology and Rheumatology and Obstetrics and, by courtesy, Gynecology in Maternal Fetal Medicine at Stanford University School of Medicine.

Dr. Simard earned her Masters and Doctorate of Science in Epidemiology degrees at the Harvard School of Public Health. During that time she trained with investigators at the Section of Clinical Sciences, Division of Rheumatology, Immunology, and Allergy at Brigham and Women's Hospital and the Cardiovascular Epidemiology Research Unit at Beth Israel Deaconess Medical Center. In 2008, Dr. Simard relocated to Sweden to begin a Postdoctoral Fellowship in Clinical Epidemiology at the Karolinska Institute in Stockholm. She became an Assistant Professor in their Clinical Epidemiology Unit in 2011, and was later honored with a Karolinska Institute Teaching Award. Leveraging the population-based registers of Sweden, Dr. Simard initiated a national register linkage study to examine the utility of registers in Systemic Lupus Erythematosus (SLE) research and develop an extensive data repository for future epidemiologic investigations.

While maintaining a close collaboration with the Karolinska Institute, she joined Stanford's faculty in 2013. Dr. Simard's work includes outcomes such as malignancy, stroke, infection, and mortality, in patients with systemic autoimmune rheumatic diseases with a focus on systemic lupus erythematosus. She has made significant contributions at the intersection of reproductive epidemiology and rheumatic disease fueled initially by a K01 career development award from the NIH (NIAMS) to study maternal and fetal outcomes in systemic lupus pregnancy. This led to collaborations with colleagues at Stanford, throughout the US, and abroad, and a series of projects focused on the diagnosis of preeclampsia and associated risks in pregnant women with systemic lupus. With support from the Preeclampsia Foundation for her lab's work examining preeclampsia risk in high-risk populations, and a McCormick Faculty Award from Stanford Medicine, Dr. Simard is taking important steps towards understanding this significant pregnancy complication in pregnancies complicated by rheumatologic disease. Dr. Simard is leading an international study of hydroxychloroquine in lupus pregnancy leveraging mixed methods in partnership with qualitative researchers, patients, clinicians, and epidemiologists in Sweden, Canada, and in the United States, and is expanding to other medications and rheumatic autoimmune diagnoses.

Additionally, Dr. Simard's lab is also interested in how misclassification, missed opportunities, and misdiagnosis contribute to disparities in complex conditions. In addition to methodologic issues around misclassification and bias and the largely clinical epidemiology focus of her work, Dr. Simard's

work examines social determinants of health and health disparities. With support from an R01 from NIH (NIAID), her lab is also studying the role of cognitive errors in clinical decision making for female-predominant diseases. This work evaluates this bias in multiple clinical specialties, including rheumatology, neurology, and primary care, and uses mixed methods including randomized survey-based studies and qualitative interviews.

ACADEMIC APPOINTMENTS

- Associate Professor, Epidemiology and Population Health
- Associate Professor, Medicine - Immunology & Rheumatology
- Associate Professor (By courtesy), Obstetrics & Gynecology - Maternal Fetal Medicine
- Member, Bio-X
- Member, Cardiovascular Institute
- Member, Maternal & Child Health Research Institute (MCHRI)

ADMINISTRATIVE APPOINTMENTS

- Associate Editor, Arthritis Care & Research, (2026- present)
- PhD Director, Department of Epidemiology and Population Health, (2025- present)
- Associate Editor, ACR Open Rheumatology, (2024-2026)
- Member, Committee on Framework for the Consideration of Chronic Debilitating Conditions in Women, National Academies of Sciences, Engineering, and Medicine, (2023-2024)
- Department of Medicine Team Science Division Representative, Department of Medicine, Stanford, (2022-2024)
- Co-Editor, Special Issue, Big Data in Perinatal Epidemiology: Methodologic Considerations, Paediatric and Perinatal Epidemiology, (2022-2023)

HONORS AND AWARDS

- Discovery Innovation Fund, Biomedical Innovation Initiative, Stanford Medicine (2017-2018)
- McCormick Faculty Award, Stanford Medicine (2018-2020)
- Peter Joseph Pappas Research Grant Award, Preeclampsia Foundation (2020)

PROFESSIONAL EDUCATION

- PostDoc, Karolinska Institutet , Clinical Epidemiology (2011)
- ScD, Harvard School of Public Health , Epidemiology (2008)
- SM, Harvard School of Public Health , Epidemiology (2004)
- BA, University of California at San Diego , Math - Applied Science (1999)
