

Zhongxiao Li

Postdoctoral Scholar, Radiation Physics

 Curriculum Vitae available Online

Bio

BIO

Zhongxiao Li is a postdoctoral researcher in Professor Ruijiang Li's lab at Stanford Medicine. His research focuses on computational biology and bioinformatics, particularly the development of deep learning methods for computational pathology and spatial transcriptomics/proteomics. Previously, his work has included developing machine learning models for histopathological image analysis, understanding gene regulation, and analyzing biological sequences.

PROFESSIONAL EDUCATION

- Doctor of Philosophy, King Abdullah University of Science and Technology (2024)
- Master of Science, King Abdullah University of Science and Technology (2020)
- Bachelor of Science, Southern University of Science & Technology (2018)

STANFORD ADVISORS

- Ruijiang Li, Postdoctoral Faculty Sponsor
