Bio

BIO

Meline Grigoryan, PhD, is a Fulbright Postdoctoral Scholar and Researcher at Stanford University. Her research explores the intersection of Artificial Intelligence (AI) in education and inclusive learning, with a particular focus on leveraging AI-driven tools for personalized learning and accessibility.

With extensive experience in inclusive education, education management, and curriculum development, Dr. Grigoryan has contributed to educational innovations and reforms aimed at fostering equitable learning environments. She has served as an Education Programs Manager and Researcher, designing and implementing strategies to enhance learning outcomes for diverse student populations.

At Stanford, Dr. Grigoryan collaborates with scholars and AI experts to explore how technology can advance accessibility, adaptive learning, and inclusive pedagogies worldwide.
