Bio

BIO

I am a medical psychologist and researcher dedicated to improving quality of life for children affected by serious illness, as well as their families. My research spans pediatric palliative care, precision medicine, psycho-oncology, and global health, and is grounded in a deep commitment to compassionate, patient-centered care. I have published more than 340 journal articles and am named as Chief Investigator on competitive research grants totaling more than \$55M.

I served as Continental President of SIOP Oceania and as a Director on the Board of the International Society of Pediatric Oncology (SIOP), advocating for children with cancer across 14 countries. I advise the World Health Organization on global childhood cancer initiatives and am a proud member of the Presidential Task Force on Advocacy for the Society of Pediatric Psychology. I am passionate about building national and global capacity in pediatric palliative care and ensuring that every child and family receives not only the best medical treatment, but also the emotional and psychological support they need.
