

Kevin Lesperance

Postdoctoral Scholar, Urology

Bio

BIO

Dr. Kevin L'Esperance is a cancer epidemiologist who focuses on the interplay between adiposity, lifestyle, and social drivers of health in kidney and ovarian cancer risk, prevention, and survivorship. His work involves patients, clinicians, and population-level perspectives to improve health literacy, integrate lived experiences, and enhance cancer care and management. In parallel, Dr. L'Esperance is actively engaged in science communication, working to raise awareness about cancer and shift the narrative from fatalism to empowerment and actionable change.

STANFORD ADVISORS
